Small business proposal:

Business overview:

The name of the business is Beauty by Reneé, which was founded in 2024 by Reneé. It is a modern South African beauty brand that specialises in beauty products such as wigs and hair products. Its mission is to provide high-quality and affordable wigs and hair products to enhance natural beauty. The brand's vision is to become a leading and trusted beauty brand in South Africa known for redefining hair excellence and helping individuals to confidently express their styles. The target audience are young women, mostly students, hair resellers and beauty entrepreneurs. (Reneé, 2025)

Website goals and objectives:

The website should increase website traffic to attract more users and build brand awareness by improving visibility on search engines through SEO and make promotions or sales. It will generate leads by capturing potential customers' information and use contact forms for enquiries. The main goal is to increase online sales by providing easy and secure online shopping experience, display pricing as well as the products along with the descriptions. It should offer multiple payment options to accommodate everyone. The website should include how to maintain the wigs and what not to do. The success of Beauty by Reneé can be measured by linking each goal to the key performance indicators. Increasing the website traffic KPIs include the number of users, page views, bounce rate and the average time spent on the website. The lead generation indicators such as contact forms, turning users into customers and email sign-ups. KPI's relating to product sales, abandoned cart rate and average order value. Providing valuable information makes the website more engaging for the users.

Current website analysis:

The website has a user-friendly and accessible layout making it easier for users to browse the wigs and hair products. The use of images and the description help the users have a better understanding of the products. There are multiple payment options and delivery options available. There are customer reviews which builds trust with the users.

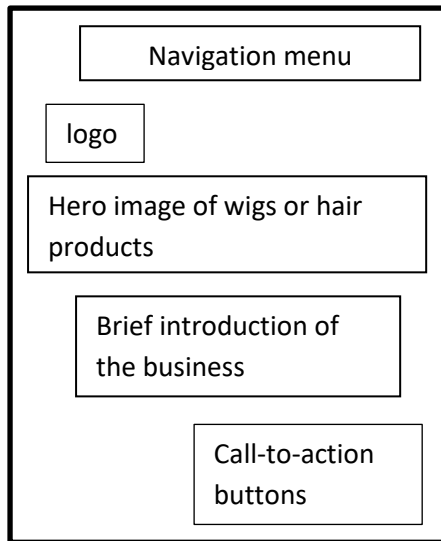

Proposed website features and functionality:

The homepage has an attractive hero shot and has call-to-action buttons like shop now leading you to the online store. The about us has a summary of the brand and the founder, Reneé. The contact page includes their working hours, cell phone number and email address. There are also links for social media platforms such as WhatsApp, Instagram, and TikTok. There are images of the products as well as a description with pricing and how to maintain the hair.

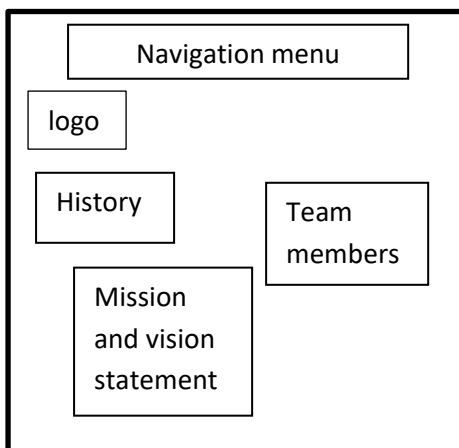

Design and User experience:

The website uses soft, feminine colour palate like the pink, white and neutral colours. It creates a warm, welcoming feeling complimenting the brand's focus which is beauty. There are modern fonts used for better readability. Headings are bold and the content is simple. The pages are sectioned logically, and layout is simple with navigations at the top of the page. Functional navigation links allow users to navigate between the webpages. Simple and clear fonts are user-friendly for the users.

Technical requirements:

The domain name Beauty by René is easy to remember, easy to spell and short. It also has a secure link for example the “https”. The programming languages and frameworks are HTML, CSS, JavaScript. HTML stands for Hypertext Markup Language. It is a markup language used to structure content in webpages like the headings, paragraphs, images, links, etc. CSS stands for Cascading Style Sheets. It is a coding language that works with HTML to style webpages. Styles such as the various font sizes, font types, borders, tables, spacing, layouts, color, etc. JavaScript is used for the functionality of a website and makes the web page interactive for users like showing pop-ups, validating forms, doing calculations, reacting when a button is clicked.

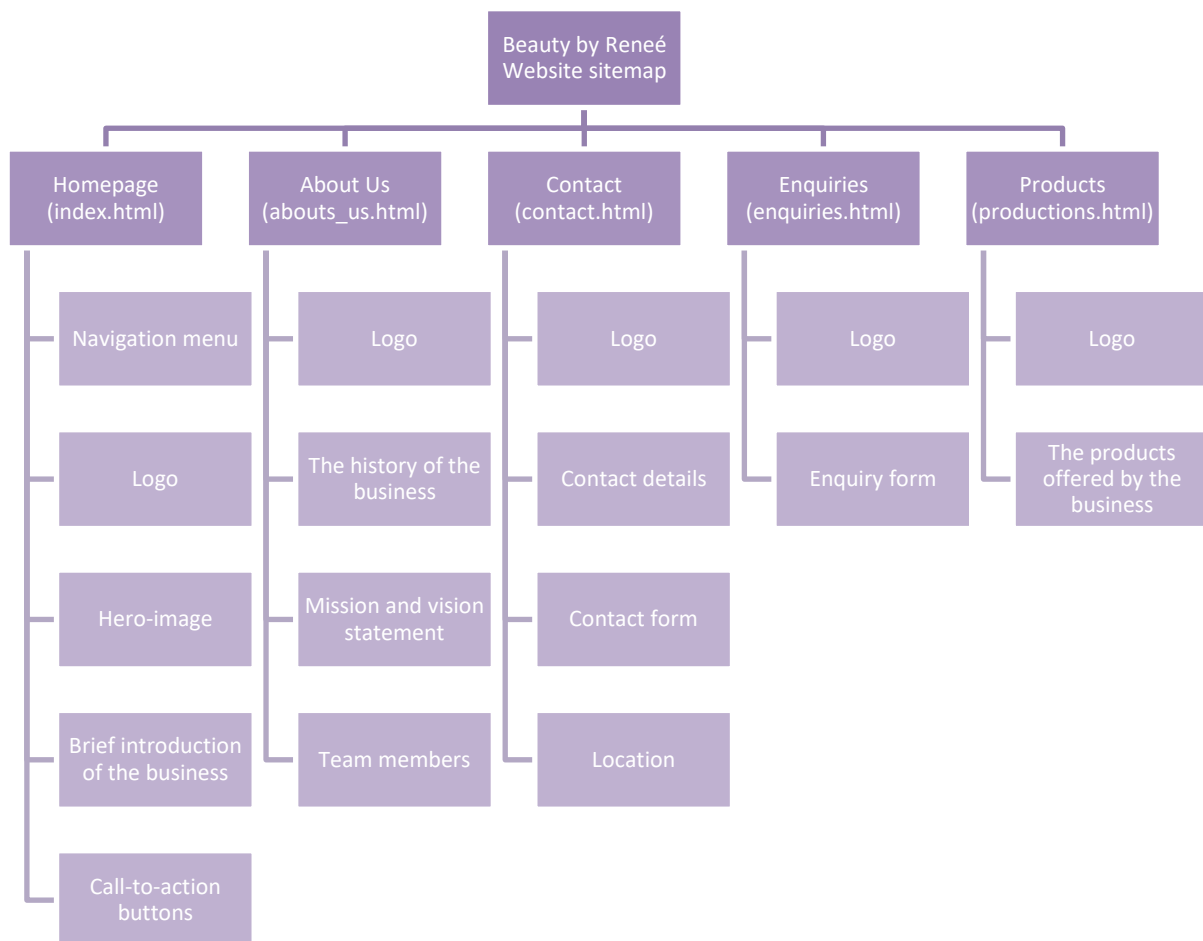

Timeline and milestones:
